

## **MAINTENANCE AND CLEANING GUIDE FOR PANASPHERE TFL PANELLING PRODUCTS**

Panasphere Premium Surfaces products are designed to be low maintenance, for interior use only. Please follow these guidelines to maintain the appearance and beauty of our thermally fused laminate (TFL) panels.

- Avoid prolonged exposure to direct sunlight.
- Clean with a mild household detergent and non-abrasive lint free cloth. Most common stains should be easily removed. (NOTE: Avoid using any corrosive chemicals such as bathroom or toilet cleaners which may permanently damage the surface) After cleaning, wipe off all residue with clean warm water.
- Avoid contact with sharp or abrasive objects. TFL is designed to be resistant to minor scratches but can be damaged if excessive force is applied to the surface. Always cover the surface first prior to placing any sharp or abrasive objects on the surface.
- Avoid contact with any hot surfaces. TFL is resistant to heat but any prolonged exposure to heat may cause permanent damage to the surface. Always use a protective pad to minimize the exposure to heat damage.
